

CLX Assignment

Problem: Create a drawing board app, which contains a plain html canvas to let user draw and write on it.

Features-

1. Implement different types of drawing brush
 - Pen- Makes permanent strokes, may vary width like 1, 3, 5 px.
 - Highlighter- Make a stroke with width 5px and color opacity of 50%, gets removed from canvas when user draw next stroke.
 - Eraser- Make strokes which removes the drawing part, drawn over.
2. Implement tool to change color of pen and highlighter.

Criterion you will be judged on-

1. Completeness and accuracy of all features implemented.
2. Coverage of corner cases.
3. Code quality and structure of your app.
4. UI and UX of the app.

No restriction on language and framework to be used.
